# CEO'S GREETING

Thank you very much for your interest in our products.

YOUNG ONE Corp. started to develop core parts of contact lens mold in 2007 as its first business, and today we have added contact lens business in 2014 to today.

We have been continuously researching in the field of contact lens molds and exporting them to all over the world.

Until now, all of our employees have made uncompromising efforts to achieve high quality products and competitive edge, Through such a process, we have completed the development of new products such as silicon new material development and obtained patent of contact lens mold.

Currently, we are getting good response to products in overseas and domestic markets, All of our employees will not spare any effort for continued growth. We always listen to carefully to satisfy the quality of all customers who made the present, I will do my best for the first time.

# CERTIFICATION

CERTIFICATE OF ISO 13485

CERTIFICATE OF KGMP

MANUFACTURING LICENSE OF KFDA

MEDICAL DEVICE PERMISSION OF KFDA

PATENT(No.10-1608792)

PATENT(No.10-1738315)

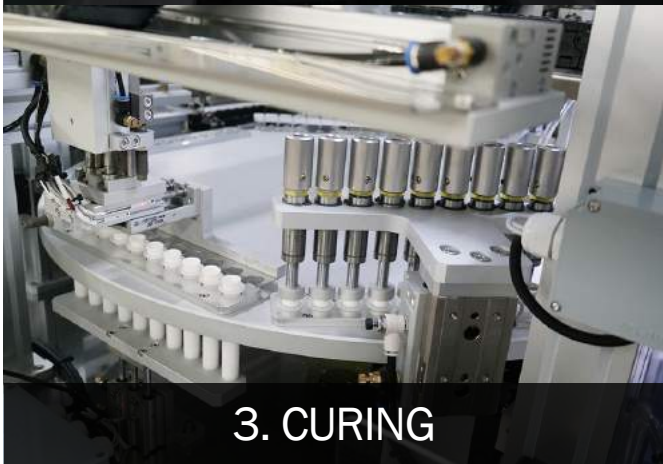

# PRODUCTION PROCESS

1. MOLDING

2. COLOR PRINT

3. CURING

4. DE-MOLD

5. INSPECTION

6. SEALING&PACKING

7. STERILIZATION

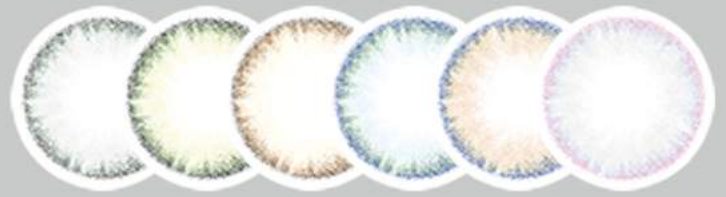

8. LABELING

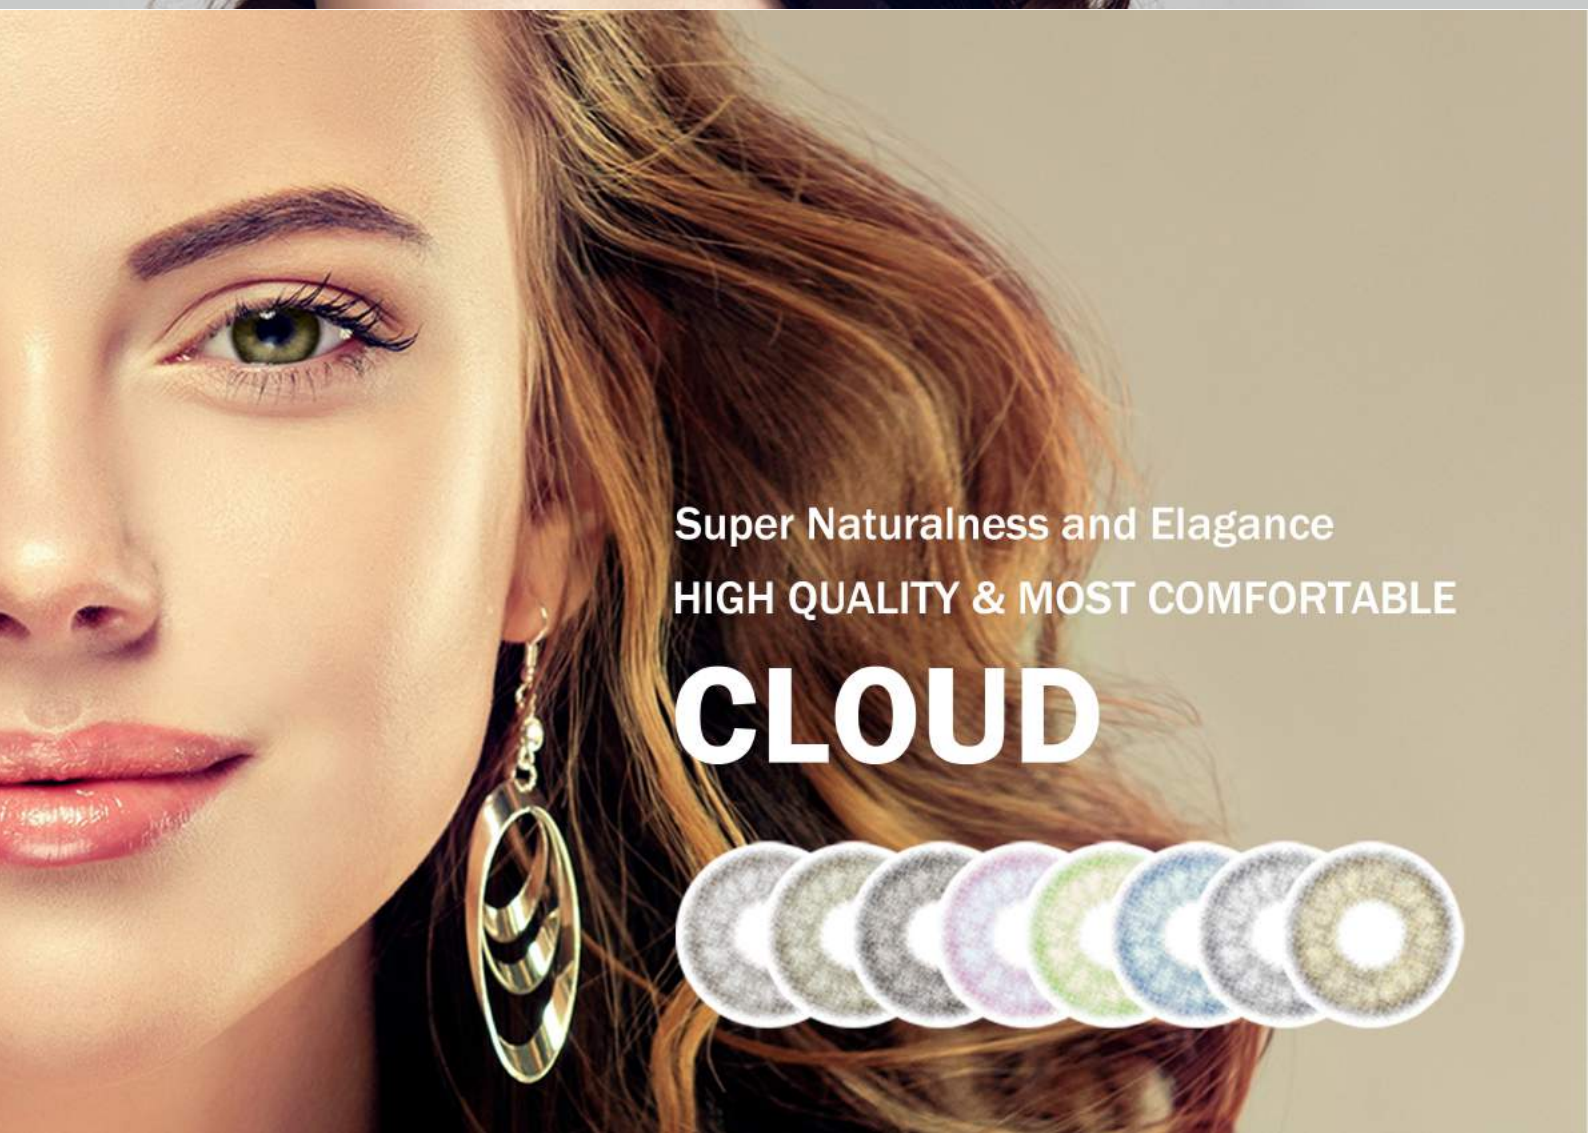

Fascinating and Comfortable  
BEST CHOICE FOR YOUR WISH TO BE ATTRACTIVE

# ROMANCE

Super Naturalness and Elagance  
HIGH QUALITY & MOST COMFORTABLE

# TECHNOLOGY

## 1. OWN FACTORY OF MANUFACTURE MOLD

All molds for making YO Contact lenses are manufactured by own factory of YOUNG ONE. It designed with an ergonomic structure of own molding technology. It makes YOUNG ONE contact lenses more comfortable. You can feel the difference by wearing our contact lenses.

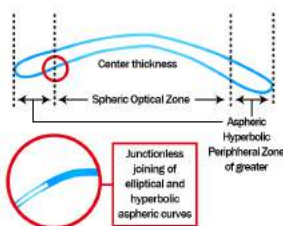

## 2. HIGH OXYGEN PERMEABILITY

Silicone hydrogel lenses of YOUNG ONE has high oxygen permeability. The silicone makes contact lens have more pores and it makes eye comfortable. Also O2 circulate more freely, creating a better environment for eyes to breathe.

## 3. EDGE DESIGN

The edge which is designed to be rounded considering the shape of the human eyes, reduces the friction between the eyes and the lens and makes the eyes comfortable.

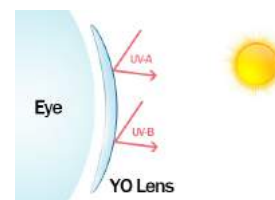

## 4. ASPHERICAL SURFACE

YO contact lens has aspherical surface that is suitable for eye appearance. It makes eyes more breathable and comfortable. Also provides a clear view.

## 5. UV BLOCKING

YO contact lens contains a UV BLOCKER to protect your eyes from ultraviolet so prevent eye aging and defective. UV is always exist even it's winter and it's not good for your eye health. Protect your eyes to UV with YO lenses!

# SPECIFICATIONS

	HEMA	SILICONE	TORIC
Diameter	13.0 ~ 15.0mm		
Base Curve	8.0 ~ 9.0 mm		
Vertex Power	-0.00 ~ -10.00 Diopter		
Center thickness	0.07 ~ 0.14mm		
Visible light transmittance	95%		
Water content	38%	47%	-
Cylinder Power	-	-	-0.75 ~ -4.25D (0.50 Step)
Cylinder Axis	-	-	10° ~ 180°
Oxygen Permeability	10 x 10 <sup>-11</sup> (cm <sup>2</sup> /s) [mL O <sub>2</sub> /(mL·mmHg)]	25 x 10 <sup>-11</sup> (cm <sup>2</sup> /s) [mL O <sub>2</sub> /(mL·mmHg)]	10 x 10 <sup>-11</sup> (cm <sup>2</sup> /s) [mL O <sub>2</sub> /(mL·mmHg)]
UV Transmittance	-	UV A (316 ~ 380nm) : 30% < UV B (280 ~ 315nm) : 15% <	-
